

FLIP POKER

The 3 hands, 9-line poker game flips the cards to you.

There are 15 cards for 3 hands on the game. The first hand is dealt on the center payline, with two other hands above and below it.

So what you hold on the center hand is held on the top and bottom hands, too. Three hands have same holding cards in case of this hold step.

Because it has 3 hands instead of one and play 9-line, allows more room for strategy that is preferred by serious players.

The Flip Poker's game strategy is the same as for regular video poker.
